

Humankind Emerging

By Bernard G. Campbell, James D. Loy, Kathryn Cruz-Urbe

Pearson Education (US), United States, 2005. Paperback. Book Condition: New. 9th Revised edition. 268 x 216 mm. Language: English . Brand New Book. The most comprehensive, up-to-date, and readable introduction to the field of human evolution. The ninth edition of Humankind Emerging tells the story of how, when, and why the human lineage developed from ape-grade ancestors. In Part I, Chapters 1 and 2 present a short history of the rise of evolutionary theory and the science of genetics, followed by a description of the various mechanisms that produce evolutionary change. In Part II, Chapters 3-5 put humans in their proper context among the primates, first discussing those aspects of modern primate behavior that help to interpret human prehistory and then describing the fossil evidence for the early stages of primate evolution. In Part III, Chapters 6 and 7 describe the australopithecine members of the subtribe Australopithecina and the first representatives of the human zoological tribe, Hominini. Part IV consists of nine chapters that detail the anatomical, cognitive, and behavioral evolution of the genus Homo and its various premodern and modern species. Here the second hominin subdivision, the subtribe Hominina, is described and interpreted. The book ends with Part V in which Chapter 17 discusses modern...

Excellent electronic book and valuable one. Better than never, though I am quite late in starting to read this one. I can very easily get a delight from studying a written book.
