From a wish not to encumber the argument as stated in the text, to which this is a note, I then abstained from noticing a prepossession or prejudice (besides that of the assumed analogy of a compulsory government paper), which, in the popular view, leads irresistibly to the persuasion, that the quantity of money, according to whatever may be the supposed test of the quantity, must have a direct influence on the prices of commodities. The prepossession or prejudice to which I allude, has its rise in the following very specious reasoning. The prices of commodities depend upon supply and demand; now, given the supply, prices depend upon the demand. But money is the instrument of demand; therefore, any increase of money must be an increase of demand, and must consequently raise prices; and as bank notes are by...
