Brand New Book ***** Print on Demand *****.Excerpt from A Laboratory Manual of Anthropometry It has long been a reproach to American science that now, for many years, the branch of Physical Anthropology has been so little cultivated, and this the more because of our early prestige in this very field and because of our unrivalled opportunities. When Morton, in 1839, published his *Crania Americana*, and followed this in 1844 by a similar work, the *Crania Aegyptiaca*, he gave the United States a leading place in the then new science of Craniology, but now after eighty years, in this and in related fields, American names are as rare in bibliographies as American merchant ships have been until recently upon the high seas. With the vast possibilities for ethnological study furnished by our aborigines, with the importation in the past of large numbers of negroes from Africa, which are now numbered by millions, and with the hordes of alien peoples from all parts of the world, who seek a foothold in the still new continent, not even Rome herself, in Imperial times, could supply such...
