

Durability in Construction: Rebuilding Traditions in 21st Century Architecture

By -

Papadakis, United Kingdom, 2015. Paperback. Book Condition: New. 276 x 222 mm. Language: English . Brand New Book. This book includes thoughts and experiences from contemporary architects who promote durability in their buildings. It demonstrates real examples of construction projects with superb photographs and informative essays. It features experts who highlight the principles, materials and techniques behind durable architecture. For centuries the idea of durability was central to the practice of architecture. Today ephemeral, short term construction has become normative; it is legislated and rolled into a system that integrates the parameters of the modern building industry with comfort and safety regulations, efficiency and fiscal return but which makes no allowance for endurance and longevity. With the topic of sustainability now at the top of professional, academic, and political agendas, a building's ability to endure longer than the immediate requirements of its user for the benefit of future generations is being recognized again as critical. Assembled here are the thoughts, experiences and examples of finished work and projects under construction by architects who embrace the notion of durability in their buildings and promote it in their writings. The essays underscore the importance of the notion of an enduring architecture,...
