Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English Brand New Book ***** Print on Demand *****.Excerpt from **A Treatise on the Forces Which Produce the Organization of Plants With an Appendix Containing Several Memoirs on Capillary Attraction, Electricity, and the Chemical Action of Light** Is the autumn of 1833, during a period of convalescence from a severe attack of the fever of the Southern States, my thoughts were first turned to the connexion of Chemistry with Vegetable Physiology. At that time, as the works on Chemistry show, comparatively but little advance had been made in this interesting department of science. In the most popular treatises, Organic Chemistry consisted chiefly of a descriptive history of the acids and bases of the vegetable and animal kingdoms. It is impossible for any one to witness in those warm climates the rapidity with which all the operations of vegetable life are carried on, without having his thoughts directed to the obvious connexion which exists between these phenomena and external agents. Even in the opinion of the uneducated planter, the rapidity of vegetable growth is connected with the warmth of the season, and the occurrence of favourable rains, and the brilliancy of the sun. A seed which has been buried in the ground a few days, makes its appearance above the surface. It soon puts forth its leaves, which turn green in the light, and becomes an active laboratory of all kinds of chemical and mechanical processes. Starch, gum, sugar, and a variety of other substances are formed from inorganic matter, water is drawn up in large quantities from the ground, and evaporated from the leaves. All these phenomena unquestionably depend on the common laws of physics. Our interest in them is greatly increased by the close resemblance...
