

## Using TRILL and Fabricpath: Designing Massively Scalable Data Centers (MSDC) with Overlays

Filesize: 6.37 MB

### **Reviews**

*Most of these pdf is the perfect ebook available. It is actually rally intriguing throgh reading period. I am pleased to explain how this is actually the greatest ebook we have read within my personal life and might be he finest publication for actually.*

*(Prof. Dario Lang)*

## USING TRILL AND FABRICPATH: DESIGNING MASSIVELY SCALABLE DATA CENTERS (MSDC) WITH OVERLAYS

Pearson Education (US). Paperback. Book Condition: new. BRAND NEW, Using TRILL and Fabricpath: Designing Massively Scalable Data Centers (MSDC) with Overlays, Sanjay Hooda, Shyam Kapadia, Padmanabhan Krishnan, Using TRILL, FabricPath, and VXLAN Designing Massively Scalable Data Centers with Overlays TRILL, FabricPath, and VXLAN overlays help you distribute data traffic far more effectively, dramatically improving utilization in even the largest data center networks. Using TRILL, FabricPath, and VXLAN is the first practical and comprehensive guide to planning and establishing these high-efficiency overlay networks. The authors begin by reviewing today's fast-growing data center requirements, and making a strong case for overlays in the Massive Scale Data Center (MSDC). Next, they introduce each leading technology option, including FabricPath, TRILL, LISP, VXLAN, NVGRE, OTV, and Shortest Path Bridging (SPB). They also present a chapter-length introduction to IS-IS, focusing on details relevant to the control of FabricPath and TRILL networks. Building on this foundation, they offer in-depth coverage of FabricPath: its advantages, architecture, forwarding, configuration, verification, and benefits in Layer-2 networks. Through examples, they explain TRILL's architecture, functionality, and forwarding behavior, focusing especially on data flow. They also fully address VXLAN as a solution for realizing IP-based data center fabrics, including multi-tenant cloud applications. Using TRILL, FabricPath, and VXLAN provides detailed strategies and methodologies for FabricPath, TRILL, and VXLAN deployment and migration, as well as best practices for management and troubleshooting. It also presents three detailed implementation scenarios, each reflecting realistic data center challenges. In particular, the authors show how to integrate multiple overlay technologies into a single end-to-end solution that offers exceptional flexibility, agility, and availability. Sanjay K. Hooda is principal engineer in Catalyst switching software engineering at Cisco. He has more than 15 years of network design and implementation experience in large enterprise environments, and has participated in IETF standards activities. His interests...
