BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 34 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. GAO has considered Department of Defense (DOD) inventory management to be a high-risk area since 1990 because inventory management systems and procedures are ineffective. This report evaluates the Air Forces inventory control procedures for material shipped to contractors for repair or for use in repair. The Air Force and contractor personnel have not complied with DOD and Air Force inventory control procedures designed to safeguard material shipped to contractors, placing items worth billions of dollars at risk of fraud, waste, and abuse. The Air Forces three inventory control points have not restricted repair contractors access to the specific items and quantities of government-furnished material needed to accomplish the contract. Quarterly reports on the status of shipped material have not been sent to property administration officials at the Defense Contract Management Agency. Contractors receiving shipped material have not (1) properly entered the receipt of shipments into their records and into the inventory control points reporting systems or (2) routinely reported shipment discrepancies. Air Force procedures for following up on shipments that contractors have not confirmed as received are ineffective, leaving the status of the shipments uncertain. The Air Force has not provided adequate program oversight because it does not request and analyze data on contractor shipment discrepancies to identify their extent and cause so that corrective action may be taken. This item ships from La Vergne, TN. Paperback.
